

EHS and Energy policy

Environment, Health and Safety (EHS) protection, and Energy Conservation are important goals and responsibility of Asteelflash as a social responsible company and a USI subsidiary. In addition to continually pursuit for higher qualities in products, activities and services, Asteelflash will ensure the health and safety of employees and the use of energy by minimizing environmental impacts and fulfill social responsibilities. Asteelflash will use limited energy resources appropriately and will commit to carry out following actions :

- \ Comply with EHS and Energy regulations,
- \ Communicate, participate and consult the knowledge and the requirements of EHS and Energy Policy continually with all employees, suppliers and contractors,
- \ Implement trainings and drills to reduce EHS risks, to prevent potential events from happening,
- \ Endeavor pollution prevention and energy management,
- \ Increase resource utilization by energy conservation, production improvement, waste reduction & waste recycling, and other cost-effective measures,
- \ Maintain EHS Management system with objectives, targets and audits, in accordance with ISO 14001
